Navy Enterprise Resource Planning Program (Navy ERP)
1700 N. Moore Street, Ste 2100
Arlington, VA 22209

FOR IMMEDIATE RELEASE

The U.S. Navy Enterprise Resource Planning (Navy ERP) Program successfully completed the Test Readiness Review I (TRR) for Increment 1.0, Financial and Acquisition, on 5 October 2006. The TRR is one of many reviews required of major Navy acquisition programs and the fourth major review that the Program has successfully completed this year.

Navy ERP Program staff presented detailed information to the Navy ERP Program Manager, Ron Rosenthal, demonstrating that the Program was ready to proceed into Integrated System Testing for Increment 1.0. The TRR addressed nine major areas: Overall Program Risk to Next Milestone, Solution Standard Configuration, Solution Custom Development, Design Maturity, Test Readiness and Execution, Training, Tools and Processes, Infrastructure, and Program Documentation. Assessments were made in these areas for development maturity, cost/schedule effectiveness, risk to determine readiness to proceed to formal testing, traceability of planned tests to program requirements and user needs, and completeness of test procedures and their compliance with test plans. All areas were assessed "acceptable" by the program staff and reported to the Program Manager at the review.

To further demonstrate that the program was ready to enter Integrated Systems Test, results from actual Test & Evaluation activities conducted on the Program's prototype, Budget Allocation, were discussed with emphasis on successful execution of all Test & Evaluation processes. Extensive unit, string and functional tests were conducted on the prototype as well as three cycles of integration testing. All test scripts and test cases were developed, recorded and executed in Mercury Quality Center to expand automated testing, reusability of test cases, and ease of test case modification.

The prototype results, the plan for Test & Evaluation for Increment 1.0, and the assessments of the key areas all summarized the readiness of the Navy ERP Program to move into the testing phase. The Program Manager concurred with the staff's recommendation to proceed and signed a memorandum declaring the TRR event a success.

###

Navy ERP is a Navy PEO EIS Program.
